Geotab Telematics and Dash Cam Data **in One Place**

DRIVER PERFORMANCE

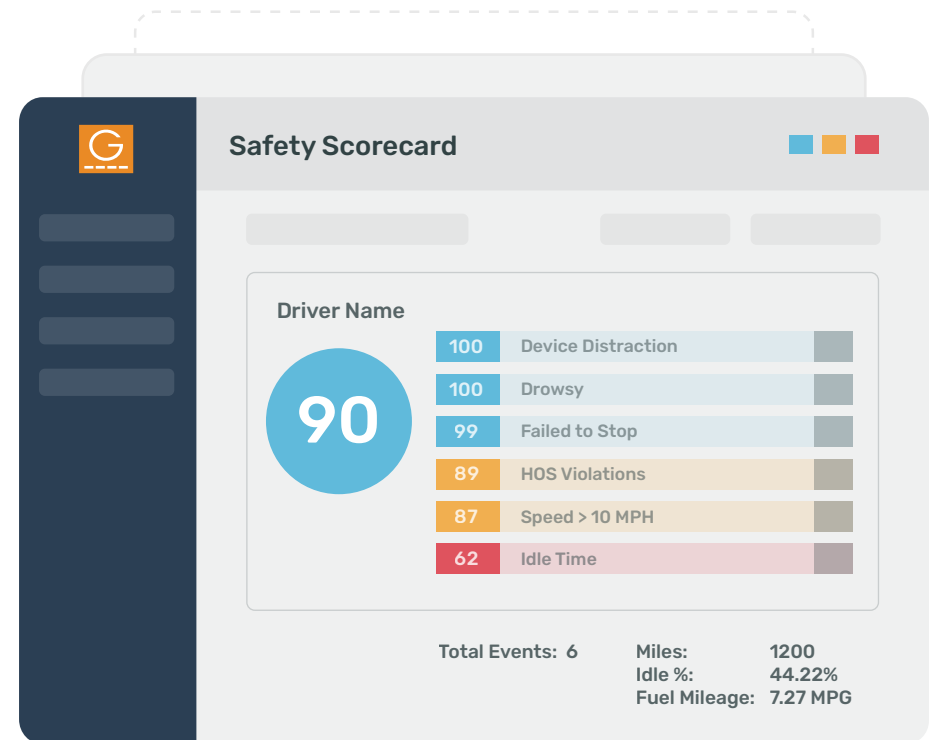

Geotab Telematics and Dash Cam Data **in One Place**

Gridline Analytics helps you uncover insights and empower strategies for increasing your fleet's safety, efficiency, and profitability.

Information overload is a real issue, especially when dealing with the data generated by Geotab and dash cameras. Gridline Analytics combines this information into a centralized platform providing you a comprehensive view to the most important aspects of your business.

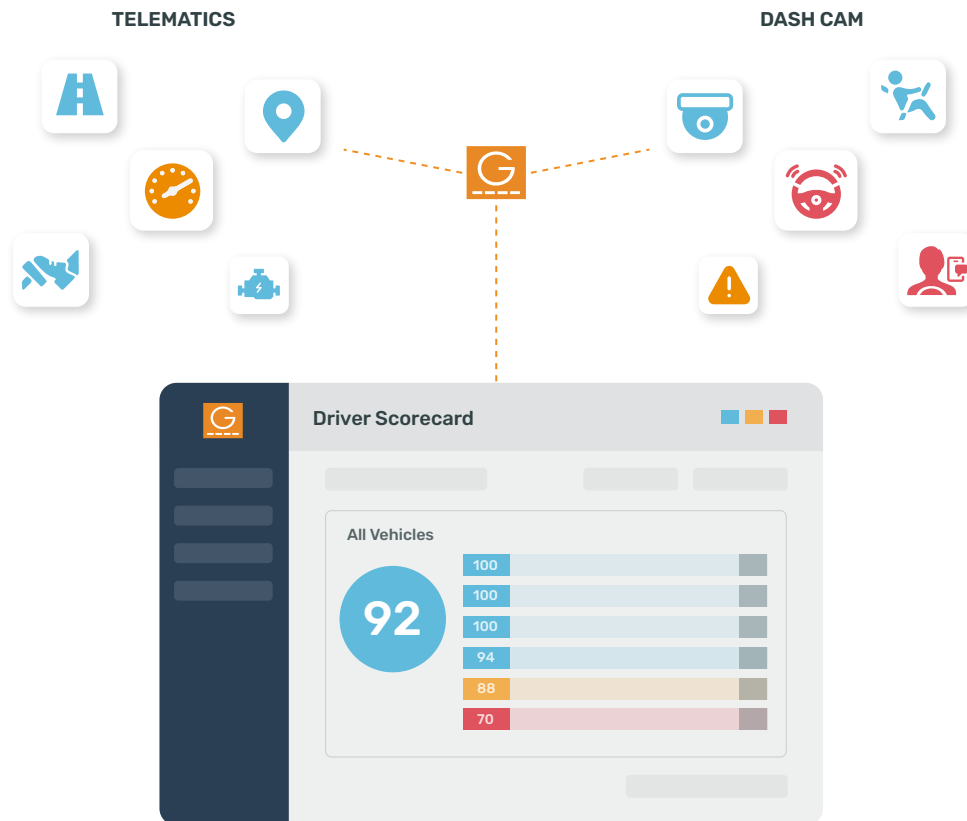

With Gridline, you can combine data, such as driver idle, driver MPG, and driver Hours of Service Violations from Geotab, with individual driver information, such as driver safety data from dash cams, to get a wholistic, single-pane view of your driver and location performance.

Gridline makes it easy with a single place to analyze all of your fleet and driver data.

Analyzing Geotab Telematics and Dash Cam Data **Together**

Integrating Geotab telematics and dash cam data helps identify specific areas of improvement for each driver or location, allowing for targeted training programs.

To give you the most comprehensive and relevant view of how your business is really performing, our Driver Performance system analyzes three years' worth of historical data to plan for your future based on the past.

- **Driver & Location Performance/Scorecard**
HOS, Idle, MPG, Dash Cam Safety Events
- **National Average/Goal**
Benchmark vehicle and driver performance for goal setting
- **3 Years Historical Data/Training**
Targeted Safety and HOS training to identify past success or failures
- **Trendlines/Performance**
Identify changes in performance over long periods of time

By combining Dash Cam safety events and Geotab telematics metrics into a single scorecard, you get a more holistic view of driver performance.

Why Gridline Analytics Driver Performance?

Gridline takes data further, giving you numerous ways to filter.

Filter by:

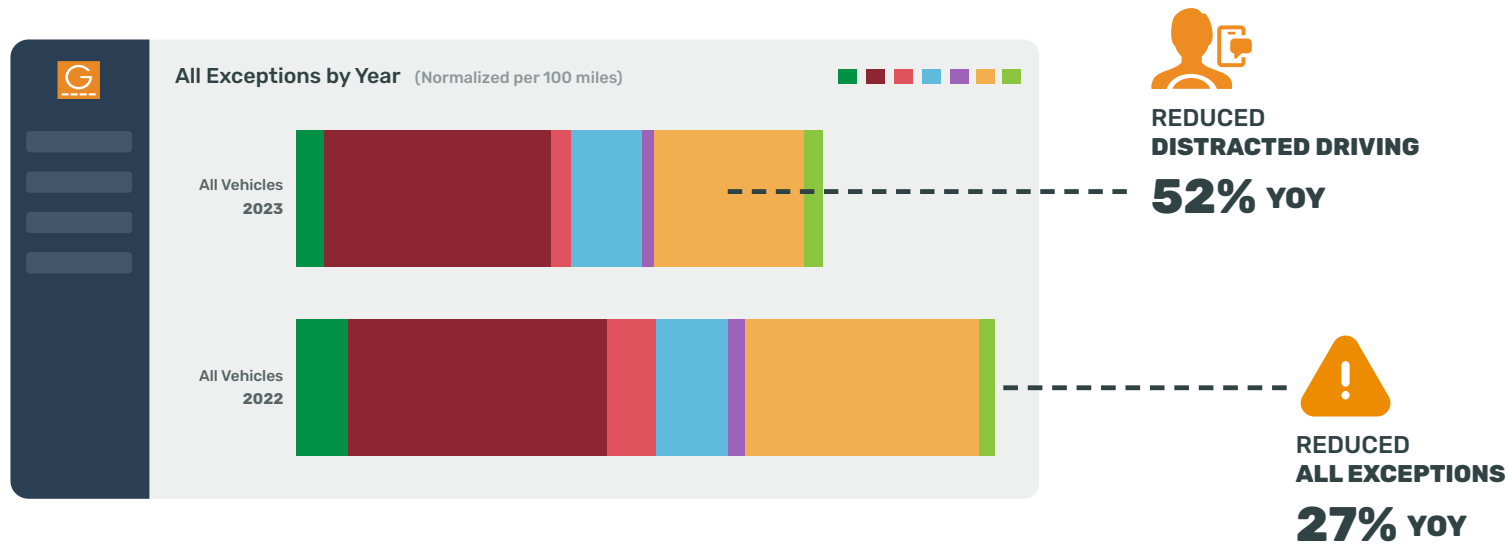

- ✓ **VEHICLE / DRIVER**
- ✓ **VEHICLE / DRIVER GROUPS**
- ✓ **HIERARCHY**

Compare:

- ✓ **WEEKLY**
- ✓ **MONTHLY**
- ✓ **YEARLY**
 - Last year
 - 2-years ago
 - 3-years ago

Don't let information overload hinder your success. Learn how you can gain a holistic view of data and drive intelligent decision-making.

Gridline Analytics brings data together from Geotab and dash cameras, analyzes your driver performance, addresses specific issues like fuel efficiency, HOS violations, and Dash Camera Safety events. Gridline will help you enhance your overall business management and performance.
